Press Release

31st May 2013
For Immediate Release

Cyber Ware Ltd completes High Tech Wi-Fi refit of England's world famous Tudor Warship the Mary Rose.

Peterborough firm Cyber Ware Ltd today announced that today's opening of the new £35m Mary Rose Museum in Portsmouth will see the launch of its latest cloud based public Wi-Fi network that will play a key role in connecting UK and international visitors not only to the Internet but to an a multi media rich experience.

With the ever increasing number of mobile devices, smartphones and tablets, the system is designed to allow visitors to use their own mobiles and tablets to connect to the Museum's wide network. Eventually visitors will be able to interact with many of the Museum's 15,000 exhibits and get a real taste of life aboard the 16th Century flagship. Visitors will engage with the Mary Rose to reveal and discover her history and secrets in exciting and entertaining ways, 500 years after she sank.

More than just a Wi-FI solution, the Cyber Ware solution provides far more than High speed internet access for visitors making use of the cloud and data warehousing technology to allow the museum to deliver a wide range of content and mobile apps to just about any smartphone or tablet and to easily build and deliver virtual, tablet based tours directly onto the visitor's own device.

"We are delighted and proud to have been involved with the project that has been dubbed "Britain's Pompeii" by historian David Starkey and are excited to see the doors finally open on months worth of development work. The opening represents the beginning of the next phase of the projects life cycle as we now have to manage, operate and develop the the service for what is set to become one of the UK's most exciting and busiest tourist attractions." - Frank Oakes MD

About Cyber Ware Ltd.

Established in 1996, one of the UKs oldest ISP's Cyber Ware has long been a leader in building and delivering innovative Network and Software solutions as a Service (NaaS-SaaS). More than just an infrastructure provider we don't just build networks, we operate them. Providing our customers with end to end delivery, as well as the processes, expertise, discipline required to deliver a consistently high quality of service to customers.   In an fast changing technology environment and escalating bandwidth costs, we provide, insight, control, support and quality of service enabling customers to better control costs.

With ever increasing expectations for better connectivity and the explosion of mobile devices, mobile devices and new Wi-Fi and IP enabled devices and with current and emerging government legislation the need to provide a managed solution and controlled access for organisations has become vital if organisations are to avoid escalating connectivity costs.

Making the right Internet choices can be challenging. Amongst other things Cyber Ware provides customers with a highly customisable yet simple, secure, scalable set of cloud based service and network solution that can be plugged into existing networks to provide a single managed solution to provide enterprise wide compliance, communications, monitoring, control and support

using cloud enabled networking.

More than a just an access solution, its Hospitality based Guest and business BYOD Smart Wi-Fi solution connects hoteliers, companies and their staff to guests, driving productivity, enhancing satisfaction and reducing costs without the need for long-term capital investments.
